

GULSHAN KUMAR SAHU

PRODUCT MANAGER

Bengaluru, India | +91 9070599155, +91 7744974713 | gulshan.sahu@hotmail.com
LinkedIn: <https://www.linkedin.com/in/gulshan-sahu>

Strategic and data-driven Product Manager with 5+ years of experience launching AI-powered enterprise products and analytics solutions. Expert in bridging Business Strategy, AI/ML capabilities, and User Experience to deliver scalable products for Fortune 500 clients. Proven track record of leading cross-functional Agile pods, translating complex business requirements into prioritised roadmaps, and driving measurable Go-To-Market success. Adept at leveraging data visualisation, generative AI, and continuous product discovery to optimise ROI, reduce operational friction, and scale user engagement.

SKILLS & OTHER

- Product Management:** Product Strategy, Roadmapping, Requirement Gathering, Feature Prioritisation, Product Lifecycle Management, Agile & Scrum, User Story Development, OKRs, Stakeholder Management, Cross-functional Collaboration, Market Analysis, Go-To-Market (GTM)
- Analytics & Data:** Power BI, Tableau, SQL, Google Analytics, A/B Testing, KPI Tracking & Dashboards, Data-Driven Decision Making, Performance Metrics (DAU/MAU)
- AI / GenAI:** AI Chatbot Development, Prompt Engineering, ChatGPT, Claude, Gemini, Midjourney, Dall-E
- UX & Research:** User Research, Usability Testing, Wireframing, Prototyping, Information Architecture, Design Thinking, Figma, Adobe XD
- Tools:** JIRA, Confluence, Azure DevOps Board, Asana

PROFESSIONAL EXPERIENCE

Product Manager — *Mu-Sigma, Bengaluru* NOV 2022 – Present

- Own the end-to-end product lifecycle for 5+ enterprise tools; led migration from legacy systems to modern UX, cutting usability friction by 23% and lifting feature adoption 19% within the first quarter of launch.
- Partnered with VP-level stakeholders to define product roadmaps; led a cross-functional squad of 7 (2 designers, 3 data scientists, 2 developers), improving delivery velocity by 20% by standardising a design system and automating hand-off protocols.
- Run user research, usability testing, and heuristic evaluations that inform product decisions, reducing usability issues by 21% and improving user engagement.
- Used A/B testing to validate design and feature decisions, and aligned squad priorities to team OKRs to keep delivery focused on business-critical outcomes.
- Defined business requirements for executive-level Power BI, React, Angular and Tableau dashboards, empowering leadership to monitor real-time KPIs, track risk signals, and make data-driven operational decisions.
- Built stakeholder trust through transparent communication and consultative problem-solving, growing analytics tool adoption across product teams by 28%.

Key Project Initiatives & Business Impact:

- A. iOS AI Chatbot for a Defense Firm**
Problem: High volume of routine internal support tickets causing operational bottlenecks.
Objective: Automate support workflows and improve employee access to information.
Approach: Defined requirements for an LLM-powered chatbot, collaborated with ML engineers on prompt tuning, and launched an MVP focused on core queries.
Outcome: Boosted Daily Active Users (DAU) by 37% and successfully reduced manual support ticket volume by 28%.
- B. Retail Marketing Mix Models (MMM)**
Problem: Enterprise retail clients struggled with suboptimal, multi-million dollar budget allocations.
Objective: Build a data visualisation product to guide optimised marketing and media spend.
Approach: Architected the product roadmap for a predictive analytics dashboard, prioritising actionable spend adjustments.
Outcome: Delivered a 15% lift in measurable ROI for key retail clients.
- C. Membership 360 Loyalty Platform**
Problem: Low customer engagement and retention on a legacy loyalty platform.
Objective: Increase platform stickiness and user lifecycle value.
Approach: Mapped customer journeys and integrated data-driven loyalty triggers to personalise experience based on analytics.
Outcome: Increased overall platform retention and active user engagement by 20%.

PROFESSIONAL EXPERIENCE (CONTINUED)

Operations & Customer Experience Manager — *Freelance, Raipur* Oct 2020 – Oct 2022

- Managed the end-to-end lifecycle and execution of 40+ complex, high-scale events, defining client requirements and prioritising resources to ensure seamless delivery.
- Optimised vendor logistics and cross-functional workflows, establishing operational efficiencies that directly drove a 15% increase in client retention and referral rates.
- Executed market research and targeted audience engagement strategies to elevate brand identity and maximise customer satisfaction.

Sales Executive — *Aakaar Medical Technologies, Hyderabad* Mar 2020 – Sep 2020

- Partnered with 50+ B2B medical clients to conduct customer discovery, identifying critical business pain points and mapping them to tailored product solutions.
- Analysed market trends and competitive landscapes to refine Go-To-Market sales strategies, successfully accelerating new product adoption by 10%.
- Influenced key decision-makers through strategic product demonstrations, securing long-term stakeholder buy-in and loyalty.

Assistant — *Oberoi Hotels & Resorts* Sep 2016 – Mar 2017

- Analysed customer feedback data to identify service bottlenecks, proactively implementing process improvements that enhanced the end-to-end user journey.
- Improved customer satisfaction metrics by 10% through meticulous attention to detail and rapid resolution of operational escalations.

EDUCATION

Post Graduation Diploma in Management, Marketing — *Universal Business School, Mumbai* 2018 – 2020

Bachelor of Science in Hospitality & Hotel Administration — *IHM Goa* 2013 – 2016
